COVER LETTER

May 2026

Dear Hiring Manager,

I lead a 30-engineer team at DevTechGuru shipping production software for clients across nine countries. I am writing to express my interest in a Senior Full-Stack Engineer or Technical Lead role at your company. After nine years building and leading engineering teams, I am targeting remote positions on EU-aligned product teams where I can contribute both as an individual engineer and as a technical leader.

My most impactful work: I architected and shipped a clinical AI decision-support tool that cut orthopedic joint-replacement planning time by approximately 40%, integrating an in-house ML segmentation model into a Django/React/AWS stack and owning the surgeon-facing UX end to end. On the infrastructure side, I built a smart-parking platform handling 100,000+ vehicles across multiple lots - zero double-bookings since launch - by designing Postgres row-level locking under high concurrent camera writes with a pluggable hardware adapter layer. Both shipped into regulated, high-availability environments with real consequences for failure.

Beyond individual delivery, I run the full engineering operation at DevTechGuru: technical hiring, RFC-first system design, trunk-based development, GitHub Actions CI/CD, and async written-communication standards that let a team span 12+ timezones without daily standups. I also design and deliver curriculum for 2,200+ engineers at Ostad, teaching full-stack development covering Python, Django, React, and React Native - which keeps my explanations precise and my mentoring instincts sharp.

My core stack is Python/Django, TypeScript/Next.js, PostgreSQL/MySQL, and AWS. I overlap with EU business hours by six hours daily and have delivered async-first for clients in the UK, Germany, and across Europe since 2021. I am comfortable owning architecture decisions, leading code review culture, and shipping features - not just one of the three.

I would welcome the opportunity to discuss how my background fits your team's current priorities. I am available for a call any day this week.

Regards,

Md. Tausif Hossain
